Farmer HCF

IP54 & IP66

AIR WATER HEATER WITH GOLD EPOXY COATING

The Farmer HCF series water heaters are high-class devices designed to work in agricultural facilities such as greenhouses, poultry houses, stables, etc. The GOLD EPOXY coating protects the heat exchanger against compounds with high concentrations of acids, ammonia and dust.

SCAN

Thanks to the Gold Epoxy coating, the heater has an antibacterial coating, which ensures:

- longer durability in aggressive environments,
- protection against bacteria growing inside the exchanger,
- protection against mold,
- protection against corrosion,
- resistance to moisture.

BENEFITS

GOLD EPOXY

The coating protects the exchanger against:

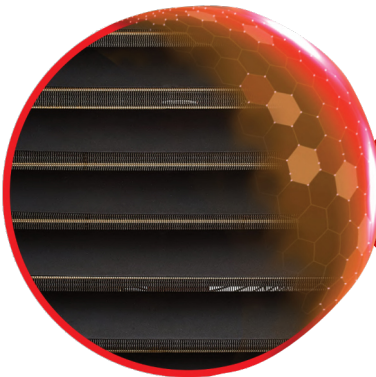

mold and bacteria,

negative impact of moisture on the device,

chemical compounds such as ammonia, tritrolechylene and acids.

Farmer Open Air

IP66

AIR WATER HEATER FOR SPECIAL PURPOSES

The Farmer OpenAir water heater is a high-class device designed to work in aggressive environments such as pig farms, poultry houses, stables, greenhouses, and car washes. The device can be opened, which allows easy access to its interior and facilitates cleaning. This is extremely useful due to the high dustiness occurring in agricultural facilities.

BENEFITS

- the heater has a GOLD EPOXY coating,
- a fan with an increased IP rating,
- the device is equipped with an opening casing that allows easy access to the heat exchanger for maintenance purposes,
- possible ceiling or wall installation.

SCAN

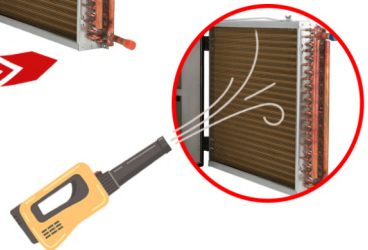

01

Open both buckles.

02

Blow out the exchanger with compressed air.

WHERE YOU CAN USE OUR DEVICES

GREENHOUSES

CARPENTRY WORKSHOPS

CAR WASHES

PIGSTIES

CHICKEN FARMS
