In order to launch WiFi Module you have to download the APP.

- Scan the QR code as below, or search “Smart Life”  at Apple Store or Google Play Store to install the APP.

WiFi Module Connected to INSPIRO

- Open the controller box of INSPIRO
- Refer to the wiring diagram of INSPIRO in the technical documentation, connect the WiFi Module to the PCB and ensure the 2.4 Ghz WiFi network signal can cover the module.
- Take a pin, press and hold the WiFi Module “black button” on the back for 6 second, until the blue light flashes one time every 3 seconds, note, if the blue light flashes one time every 0.5 seconds, then repeat the

operation again, until flashes one time per 3 seconds.

Network Connection

- Enter the app, register and login accordingly.
 - Under the home page  , press  at top right corner to add the INSPIRO.
 - Press “Small Home Appliances” and then press “Ventilation system (BLE+Wi-Fi)”
- 
- (Ventilation system(BLE+Wi-Fi))
- Confirm “indicator slowly blink”, press next step.
 - Chose the wifi network selection, input  xxxxxxx correct wifi password. Press next step.  *****
 - Choose the correct device hotspot, which is normally named “SmartLife-xxx”, until the hotspot is successfully connected. Press “Return” at the top left corner to return and wait for the ventilator to be connected to the mobile phone.

- After the connection is successful, press  to edit the ventilator name, and press “Done” to enter the ventilator control page.
- On the home page, user can repeat these same steps to add more INSPIRO into the APP.

Control Page Introduction

- The main control page shows the information of INSPIRO, including fan speeds, indoor temperature and different data of indoor air after connecting to the CO₂ sensor, humidity sensor, etc.
- On/off button to turn on or turn off the ventilator.
- Supply air button to set supply air volume.
- Exhaust air button to set exhaust air volume.
- Temperature button to set activated re-heater temperature after connecting a heater to the INSPIRO.
- Setting button to set the auto bypass opening temperature range, filter alarm timer and ERV timer on/off function.
- On the main control page, press  to find the “Share device”, by adding a new sharing , input the family member account number (mobile

number), this family member can also find the INSPIRO on the home page and control it.

Other Icons on Control Page

- If “” appears, then it means the INSPIRO error, the error code will be displayed and please ask for professional electrician to maintain it accordingly.
- If “” appears, then it means the INSPIRO is in defrost status, after the defrost is finished, the “” will disappear.
